**Mineral Exploration Company
and Geological
Consultants**

ABOUT US

MME was incorporated as a Junior Mineral Exploration company focussing on discovering and developing the undoubted mineral reserves in India, however, additional services include the provision of geological consultants, management of Joint Ventures and creation of business ventures and partnerships between Indian and foreign companies.

Currently **MME** has applied for tenements after several months of desk study and background geological analysis and we are seeking suitable JV partners and seed capital to progress these applications to the next phase of development.

PROJECT GENERATION

MME possesses the experience and technical ability to generate tangible mineral projects from historical data, archived government and private company reports, field work and analysis of geochemical and geological data.

The projects that are being generated in-house at this time are a culmination of experience gained over many years of mineral exploration in different countries and through the attendance of various technical training seminars and peer guidance.

Such projects include diamond, base and precious metal projects in Uttar Pradesh, Madhya Pradesh, Rajasthan, Orissa, Chhattisgarh, Andhra Pradesh and Karnataka.

PROJECT MANAGEMENT

Having managed mineral exploration projects in post-conflict, developing and developed countries, **MME** has a diverse experience base and is ideally suited to operate efficiently, effectively and safely in diverse work environments worldwide.

Clients include multinational public and private companies to listed companies in developing countries.

Our experience working for and with multinational mineral and mining companies not only gives us an edge when assessing the potential of areas interest in India but many years of operation in India has honed our skills at keeping costs down without lowering standards.

BUSINESS VENTURE CREATION

MME provides a medium through which companies and investors are able to meet and to generate Joint Ventures and also act as 'chaperones' to companies not familiar with operating in foreign or countries less developed than their home country, to ensure a 'soft landing' to the start of their venture.

MME has recently established a venture between a well respected international consultancy and a publically listed multi-million dollar market capitalised Indian natural resource company.

REGION AND PROJECT APPRAISAL

The founder and Director of the company has 17 years of resource

industry experience and has operated in India since 2001.

Prior to establishing projects or interest in an area it is essential that the mineral prospectivity, political stability, safety and sovereign risk are known to the Company.

MME can provide a solution to all these issues and assist in successful decision making at board level based on solid data and intelligence.

HSEC

MME supports the highest standard of Health, Safety, Environmental and Community Relations.

Standard Operating Procedures and Policies are constantly

reviewed and adapted to suit individual situations due to the varied and diverse nature of the work environment.

Resource Expertise and Experience

IRON ORE

- WEST AFRICA: Exploration and management of world class hard rock deposit.
- AUSTRALIA: Exploration, evaluation and mining for both hard rock and detrital deposits.
- INDIA: Project generation and grass roots exploration.

GOLD and COPPER / GOLD

- CENTRAL AFRICA: Grass roots exploration, project generation and due diligence studies on existing and abandoned mines in DRC, Congo and Angola.
- EAST AFRICA: Establishment of exploration office, recruitment and project management.
- PHILIPPINES: Due diligence and QA/QC for advanced stage Copper/Gold porphyry project in preparation for JORC compliance and proposed listing.
- AUSTRALIA: Mining and exploration operations in Western Australia.
- INDIA: Generative, operational and exploration management activities.

DIAMOND AND GEM

- INDIA: Grass roots exploration and discoveries of lamproites and diamondiferous kimberlites. Corporate establishment, tenement application and management of Junior Exploration company.
- AUSTRALIA: Discovery of diamondiferous kimberlites through grass roots exploration. Evaluation of known diamondiferous kimberlites using Bauer rigs and DMS plants. Exploration and geotechnical drilling programmes for open pit and underground operations.
- CENTRAL, EAST and SOUTH AFRICA: Project acquisition, due diligence, evaluation drilling and mine appraisal. Consultancy and training roles for private and public companies.

COAL

- INDIA: Business development, project generation and Joint Venture creation between Indian and foreign resource companies.

TIN/TANTALUM/COLUMBITE

- DRC: Due diligence and project evaluation on historical mining areas in Eastern DRC.
